

Decisiv Launches Combined Platform for Mack and Volvo

MVASIST to combine Mack.ASIST and Volvo.ASIST to connect fleet managers with dealers and service locations, increases uptime, decreases guesswork

Glen Allen, Virginia – October 9, 2007– Decisiv, Inc., the provider of an advanced web-based technology designed to enable more informed and timely decisions critical to maintaining commercial vehicles, today announced that it has rebranded and relaunched the Mack Trucks and Volvo Trucks of North America versions of its Service Management Platform. The Mack and Volvo versions will now be combined and renamed MVASIST, and based on appropriate dealer codes will support Mack trucks, Volvo trucks or both.

A next-generation service estimating tool, MVASIST is a new program that merges the former Volvo.ASIST and Mack.ASIST programs into one web-based estimating tool that allows dealers to prepare complete and accurate estimates in a matter of minutes. There are two versions of the program:

- MVASIST/Pro, the full version can be used to generate estimates on any truck and requires a monthly subscription fee. MVASIST/Pro includes more than 175 pre-loaded service operations, is VIN-specific with parts information pulled directly from build information, is customizable to a dealership's individual pricing variables, and expandable with quick lube and body shop capability, including interactive inspection sheets, crash parts, paint times, etc.
- MVASIST/Fleet is a limited version that can only be used to provide estimates for preloaded fleet vehicles but is available to dealerships at no charge. MVASIST/Fleet not only provides dealers with fleet-specific data, but participating fleet managers also have the ability to log into a private portal to

gain online access to estimates for review, comment and approval. Dealers may also request that specific fleets be added into the MVASIST/Fleet database.

“For Mack and Volvo truck dealerships, MVASIST is the next generation of service estimation technology,” said Dick Hyatt, president of Decisiv. “These OEMs are leading the industry with this cutting-edge tool by taking customer satisfaction and the ease of service estimating to the next level. Customers continually say they want fast, consistent, professional and accurate service estimates. MVASIST was created to meet this demand and can greatly improve a dealership’s hours per repair order and effective labor rate.”

About Decisiv, Inc.

The Decisiv Service Management Platform is revolutionizing the way North American Medium- and Heavy-Duty Trucks are serviced and maintained, and benefiting Transportation Fleets, Dealer and Service Locations and OE Truck and Component Manufacturers. Founded in 2001 and based in Glen Allen, VA, Decisiv designed its platform to dramatically increase the efficiency of the service initiation and fulfillment process. Decisiv pulls together historically separate silos of information through its use of advanced technology and unparalleled access to critical service information from source providers. The platform leads to improved vehicle uptime, lower operating costs, and enhanced business processes and customer satisfaction. For more information, visit www.decisiv.com.
