

Prime, Inc First to Use New Integrated Decisiv Solution

Decisiv, Inc. completes integration with TMT Fleet Maintenance software

Glen Allen, Virginia – September 17, 2009 – Decisiv, Inc., the provider of an advanced web-based technology designed to connect fleet managers with internal and external service locations to more effectively manage service events and expedite the service process, today announced completion of the integrated solution between FleetPlus, Decisiv's fleet facing service management software platform, and TMT Fleet Maintenance software from TMW Systems Inc.

Available to any fleet using the Decisiv's FleetPlus service management platform and the TMW software, this new functionality compresses inspection time and flows accurate data into the TMW maintenance management system.

Springfield, Missouri-based Prime, Inc., a leading refrigerated, flatbed and tank carrier, has successfully deployed the newly integrated solutions. Decisiv's FleetPlus enables Prime to streamline trailer and end of lease truck inspection processes and capture results more accurately and quickly. The completed integration enables Prime to seamlessly transfer the inspection results to the TMT Fleet Maintenance system.

"Decisiv is very pleased to be working with Prime and with TMW Systems, a leader in the Fleet Maintenance software market, said Dick Hyatt, president of Decisiv. "We recognize the need to help our fleet customers streamline their service management process and use advanced technology to eliminate paper, improve accuracy and speed maintenance and repairs. By working together with TMW we have met these goals for our shared customer."

The initial Decisiv-TMW integration enables fleets to perform interactive inspections using Motion Computing tablet PCs. At Prime, trailer inspections are done at 30-day intervals as well as at the end of a tractor lease. The results of the inspections are sent from Decisiv's FleetPlus into the TMT Fleet Maintenance software using a standard XML interface. Failure items are grouped according to VMRS system codes and individual failure items are noted as comments. At pre-determined intervals, the TMW software uses the FleetPlus data to open repair orders for trailer inspections and for failures. For tractors leased to owner-operators, the inspection can result in repairs charged to the lessee to bring the truck up to spec.

FleetPlus, the latest fleet-facing version of the Decisiv Service Management Platform is in use at a number of large national fleet customers, providing

enhanced communication with service locations and increasing asset utilization by reducing downtime and improving repair quality. Earlier this year, Decisiv certified the wireless F5 tablet PC from Motion Computing for use with the Decisiv Service Management Platform.

Developed over nearly eight years, the Decisiv Service Management Platform is bridging the service management gap by bringing service locations and fleets together onto a common communication platform. Today over 100 fleets utilize the Decisiv platform as well as one third of dealer and distributor service locations. The Decisiv Service Management Platform is licensed under the brand names Diamond Estimating System and ServicePartner at International dealerships, MVASIST at Volvo Trucks North America and Mack Trucks dealers, DSMP at Freightliner and Detroit Diesel Allison (DDA) service locations, Quotelt at W.W. Williams service locations and Prevost.ASIST at Prevost repair facilities.

About TMW Systems

TMW Systems, Inc., is committed to delivering customer-driven solutions that help companies in the transportation services sector seize market opportunities while improving profitability and gaining a better return on information. TMW customers include 3PLs and shippers, private and for-hire trucking, brokerage, construction, ready-mix concrete, municipal fleet, heavy-duty repair and waste management operations. With offices in Cleveland, Ohio; Durham, North Carolina; Indianapolis, Indiana; Dallas, Texas; and Vancouver, British Columbia; TMW currently serves more than 1,600 customers managing over 325,000 power units and maintaining more than 1.1 million assets worldwide, including North America, Europe, China and Latin America. About Decisiv, Inc.

The Decisiv Service Management Platform is revolutionizing the way North American Medium- and Heavy-Duty Trucks are serviced and maintained, and benefiting Transportation Fleets, Dealer and Service Locations and OE Truck and Component Manufacturers. Founded in 2001 and based in Glen Allen, Virginia, Decisiv designed its platform to dramatically increase the efficiency of the service initiation and fulfillment process. Decisiv pulls together historically separate silos of information through its use of advanced technology and unparalleled access to critical service information from source providers. The platform leads to improved vehicle uptime, lower operating costs, and enhanced business processes and customer satisfaction. For more information, visit www.decisiv.com.

About Prime, Inc.
