VMRS Encoding

Accurately coded VMRS service operations represent a tremendous value in managing your fleet costs. You want to understand the overall performance and service costs of your vehicles. VMRS coding provides the necessary structure to analyze your data, make informed business decisions, and drive profitability.

Reducing Costly Overhead

Most fleets and asset managers have resorted to manually coding VMRS operations, which is inefficient and adds directly to administrative overhead. In addition, if you're not capturing the correct codes, you're losing valuable asset and service cost data.

Delivering Accurate VMRS Codes, Automatically

By employing Machine Learning and Artificial Intelligence, Decisiv's VMRS Encoding is able to analyze, define, and assign accurate VMRS codes to repair operations.

Simplifying VMRS Coding

With Decisiv's VMRS Encoding, you'll receive all your fleet's VMRS encoded operations, in a common format, for upload into your Fleet Management System (FMS) or other cost tracking system.

Realizing the Benefits

Decisiv VMRS Encoding will immediately improve the quality and quantity of your critical service cost data for every asset. Better asset cost and performance information drives better maintenance cost analysis and gives you a more accurate picture of the entire life-cycle service cost of your assets.

VMRS Encoding is part of SRM Discovery, Decisiv's suite of data and analytics capabilities so that you are able to leverage service data from your assets to make faster, more informed business decisions and drive profitability.

Getting Started

Gaining improved and accurate insights into your fleet costs is fast and easy. If you're using any of the Decisiv-powered service management systems, then you're able to immediately take advantage of VMRS Encoding: Volvo /Mack ASIST, PACCAR Solutions Service Management (PSSM), Isuzu Connect, Hino Case Management, TICO EDGE, Michelin MAESTRO, or Wheeltime LINQ.

> With Decisiv's VMRS Encoding you can stop doing costly, time-consuming manual catch-up.

> Decisiv VMRS Encoding can consistently and accurately encode more than 75% of the service events on the Decisiv platform.

PUT THE POWER OF YOUR FLEET'S OWN DATA TO WORK FOR YOU
